

COVID-19 VACCINE CLINIC

We're Sure You've All Heard of Operation Warp Speed

But do you know the facts? The US Department of Health & Human Services states that Operation Warp Speed's goal is to produce and deliver safe and effective vaccines as part of a broader strategy to accelerate the development, manufacturing, and distribution of COVID-19 vaccines, therapeutics, and diagnostics to be delivered to patients more rapidly while adhering to standards for safety and efficacy.

See below for information on OWS plan and what's happened so far.

We are confident in the facts!

Who would've thought that we'd have a vaccine in less than a year? But here we are about to open our COVID-19 Vaccine Clinic at Hancock Health. But we all know that with the speed that the vaccine came about and the tumultuous political climate that there are questions. One such question we have received is ***"Can I trust the vaccine and the government?"***

We are confident in the facts. As Steve says in his video below, "Our

physicians and clinical staff have been pouring through the data to make sure we understand and trust in the information that is coming out."Â

[See Steve's comments on trust in the COVID-19 vaccine.](#)
