

# COVID-19 VACCINE CLINIC

## What is the mRNA vaccine?

mRNA, also known as messenger RNA is a new type of vaccine. Many questions have been asked in regards to mRNA, but this new technology is the main reason the COVID-19 vaccine was able to be produced so quickly. Another positive to mRNA vaccines, they do not use the live virus that causes COVID-19. In simple terms, the vaccine you will receive **WILL NOT** give you the COVID-19 virus.

Another great resource from one of our very own associates.
